Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The present invention relates to a data transmission method and a data transmission system for transmitting a plurality of streams over a network when communicating, streaming, etc. among a plurality of terminals.

The prior art of record in combination or alone fails to teach or suggest these elements of independent claims 5 and 13 in combination with other elements. For example independent claim 5 has claim limitations such as when a network having a superior property is defined as a master network, and the others are defined as slave networks, monitoring the delay values of the slave networks based on the master network as the standard and restricting the transmission of data through a slave network when that slave network has more than a certain delay in comparison with the master network. Similarly independent claim 13 has claim limitations such as when a network having a superior property is defined as a master network, and others are defined as slave networks, the first device monitors delay values of the slave networks based on the master network as the standard and restricts the transmission of data through a first slave network when the first slave network has more than a certain delay in comparison with the master network. For the above reasons, independent claims 5, 13 and dependent claims 6-7, 14-15 are allowable.

2. Claims 5-7, 13-15 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
